HU-EX6 450 SERIES

Slim. Smart. Efficient.

The HU-EX6 450 is a compact, high-efficiency counter-flow plate heat exchanger from the HU-EX6 series, designed for integration into space-restricted air handling units.

With dimensions of 450×270 mm, it is suitable for systems with airflow rates **up to 700 m³/h** and can be used in residential and light commercial ventilation units, including apartments, houses, and offices.

The heat exchanger is built from polystyrene plates with an optimized internal geometry, enabling thermal efficiency of **up to 93%**.

The unit is available in aluzinc or aluminum housing options, making it suitable for operation in a wide range of environments.

Its construction is non-hygroscopic, corrosion-resistant, and maintenance-friendly, supporting high performance in compact units.

MAIN ADVANTAGES

Optimized energy transfer

Optimized plate geometry and flow path enable high heat recovery up to 93% in a compact volume.

Balanced pressure drop

Flow channels are designed to minimize resistance while ensuring consistent heat exchange.

Compact, shallow profile

HU-EX6 450 fits into flat AHUs and space-restricted ventilation units

Reliable in real conditions

Stable performance under variable airflow and system conditions – no loss in effectiveness.

HU-EX6 450 SERIES DEPENDENCY DIAGRAMS

Test results on a HU-EX6 450/100...500-1 model with a depth of 100...500 mm, test conditions according to DIN EN 13141-7 (as well as EN 308)
